

Cloud Backup for SMB

AWS Backup

With AWS Backup, your business data is always protected, recoverable and compliant. Hit by ransomware, a service outage or an accidental deletion, you can be back online in 5–20 minutes with only a few seconds' data loss. One policy protects everything — servers, databases, file systems and storage — with immutable, ransomware-resilient recovery points. Automated testing and continuous compliance monitoring free your team from manual backup maintenance.

WHAT TYFLEX DELIVERS

- One backup policy across servers, databases, file systems and object storage
- Immutable, ransomware-resilient recovery points with enterprise-grade durability
- Automated backup testing and continuous compliance reporting — audit-ready
- Lifecycle rules that move older copies to lower-cost storage automatically
