

Website & App Hosting for SMB

AWS Lightsail / Amplify blueprints

Your website can be your greatest competitive advantage. With the right hosting behind it you get faster pages, smoother journeys and the reliability customers expect. Launch or upgrade in minutes with pre-configured blueprints, then scale as the business grows — no hardware, no rebuilds. Built-in enterprise-grade security keeps customer data safe, and predictable pricing means no budget surprises.

WHAT TYFLEX DELIVERS

- Launch or migrate your site onto AWS using pre-configured blueprints — days, not a rebuild
- Faster page loads and smoother performance, with downtime cut significantly
- Effortless scaling as traffic grows — no re-architecting
- Built-in enterprise-grade security and predictable, usage-based pricing
